

JavaScript Topics (Basic to Advanced)

Complete JavaScript Topics List

1. Introduction to JavaScript
2. Basics of JavaScript (Syntax, Variables, Data Types)
3. Operators and Expressions
4. Conditional Statements (if, else, switch)
5. Loops (for, while, do-while)
6. Functions (declaration, expression, arrow functions)
7. Scope (local, global, block)
8. Hoisting
9. Closures
10. Arrays and Array Methods (map, filter, reduce, forEach, etc.)
11. Objects and Object Methods
12. DOM Manipulation (getElementById, querySelector, etc.)
13. Events and Event Handling (addEventListener, event delegation)
14. Form Validation
15. Error Handling (try, catch, finally)
16. Callbacks
17. Promises
18. Async/Await
19. JavaScript ES6+ Features (let, const, arrow functions, template literals, destructuring, spread/rest operators, etc.)
20. Classes and Object-Oriented Programming (constructor, inheritance)
21. Modules (import/export)
22. JavaScript in Browser (Window, Document, Location, History objects)
23. Timers (setTimeout, setInterval)
24. JSON and AJAX
25. Fetch API
26. LocalStorage and SessionStorage
27. Regular Expressions (RegExp)
28. Debouncing and Throttling

JavaScript Topics (Basic to Advanced)

29. JavaScript Memory Management
30. JavaScript Engines (V8, SpiderMonkey)
31. Event Loop, Call Stack, Web APIs, Microtasks & Macrotasks
32. Functional Programming in JS
33. Design Patterns in JavaScript (Singleton, Factory, Observer etc.)
34. Testing in JavaScript (Jest, Mocha)
35. Introduction to TypeScript (optional advanced)
36. Debugging JavaScript (using browser dev tools)
37. Writing Clean and Maintainable JavaScript Code
38. Advanced DOM Techniques (Shadow DOM, Custom Elements)
39. Webpack and Babel Basics (optional for project setup)
40. Working with APIs (REST, GraphQL)
